## Response to Amendment

1. This action is responsive to amendment received on 2/21/2006.

## Response to Arguments

2. Applicant's arguments, see amendment, filed 2/21/2006, with respect to the rejection(s) of claim(s) 1-4 under 35 USC 102 (b) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, in view of amendments to claims 1 and 4, a new ground(s) of rejection is made.

Applicant argued that the cited art, Huussko (US 6,397,065) does not disclose the added limitations in claims 1 and 4. However, the new art cited below reads on the added limitations.

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1-4 rejected under 35 U.S.C. 103(a) as being unpatentable over Huussko (US 6,397,065) in view of "RESEARCH ACTIVITIES ON UMTS RADIO INTERFACE, NETWORK ARCHITECTURES, AND PLANNING (IEEE 1988) by Ermanno Berruto et al. [XP 000740416] (hereinafter 'Berruto').

Art Unit: 2616

Consider claims 1, 2 and 4, Huusko discloses a network comprising a location area connected by a radio access network (column 1, lines 43-45) to at least two core networks having different functionality (column 1, line 43), wherein the radio access network switches packet transmissions from each terminal in the location area to one of at least two core networks (column 1, lines 57-60) characterized in that the radio access network switches packet transmissions from each terminal to one of the at least two core networks in dependent on the terminal's capabilities (column 1, lines 57-63). Huusko discloses various types of core network connected to a 3G radio access network, however, Huusko does not specifically discuss "connecting 2G radio access network to 2G core network terminals that are not capable of connection to 3G radio access network,..." as added in the claims 1 and 4 via amendment.

Berruto, in the same field of endeavor, discloses a dual mode operation such that the 2G (GSM) network connects to 2G core network terminals not capable of connection to 3G (UMTS) network and connecting to 3G terminals that are capable of connecting to 3G network (see "Assumed Basic Network Architecture For the Radio Interface Definition" page 88, Figures 4 and 5).

Regarding claim 3, Huusko teaches a location updating method (column 3, line 24-28) in which the radio access network switches packet transmissions from each terminal to one of the at least two core networks in dependence on the identity of the cell in which the terminal is connected.

Art Unit: 2616

Therefore it would have been obvious to one of ordinary skill in the art, at the time of invention, to modify Huusko utilizing teachings of Berruto for an efficient global multimedia mobility.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Widegren et al. (US 6,374,112); Rinne et al. (US 6,574,473).

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
